### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Brandt '984, '153, and Goldbeck '730 disclose various train positioning systems. Among these references and the references cited by Applicant, Goldbeck appears to be closest to the present invention. Figures 4A-4C of Goldbeck show a system with vertically pivoting dogs including springs 80,82 attached to the respective dogs; wherein, springs 80,82 are readable as first and second actuating devices that independently move the dogs, as broadly required by the instant claim 1; however, the dogs and the claimed structures associated thereto are not arranged to pivot the dogs in a horizontal plane as required by instant claim 1. On the other hand, as noted in the second embodiment shown in Figures 5A-5C of Goldbeck, the dogs and the claimed structures associated thereto are configured to pivot the dogs in a horizontal plane, as required by instant claim 1; however, since this system uses single linkage member 89 to connect the dogs in fixed linkage, this system does not include structures that are readable as first and second actuating devices similar to that of the first embodiment of Goldbeck. It is further noted that any attempt to modify the single linkage connection in the second embodiment of Goldbeck into a linkage assembly similar to that of the first embodiment of Goldbeck would destroy the intended teaching of Goldbeck. Accordingly, independent claim 1 along with claims 2-19 depending therefrom are considered to be defined over the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
